Experience

Servio Technologies

Lead Technical Consultant

Pueblo de Panay, Roxas City, Philippines

September 2025 - February 2026

- Lead client support and custom development projects within the Frappe Framework and ERPNext ecosystem.
- Provide technical guidance and solutions to ensure client satisfaction and successful system implementation.
- Coordinate and mentor junior consultants, teaching best practices in version control, development standards, clean architectural code flow, and conducting code reviews before production deployment.
- Participate in applicant interviews and contribute to technical assessments for hiring decisions.
- Oversaw project delivery planning and Docker-based system deployment initiatives across client environments and cloud VPS servers.

Servio Technologies

Technical Consultant/Software Developer

Pueblo de Panay, Roxas City, Philippines

October 2023 - September 2025

- Provided customer success management (CSM) support by guiding clients through system concerns and ensuring optimal ERPNext usage and performance.
- Developed and implemented customizations within the Frappe Framework and ERPNext applications based on client requirements.

- Managed sandbox environments, ensuring synchronization and uptime consistency with production servers.
- Contributed as a Technical Expert in the development of TESDA NC III Python Programming curriculum and facilitated training sessions for 3 months.
- Resolved SQL deadlock issues for enterprise client Sante Barley PH by optimizing query efficiency, eliminating redundant database calls, and guiding proper JOIN usage to improve database reliability and transaction handling.

Coders Tribe
Software Developer – OJT

Negros Occidental, Philippines
 February 2023 - July 2023

- Led front-end design and development for Faith Academy's FAR Project using Svelte, enhancing UI responsiveness and visual appeal.
- Developed modular, reusable components to improve code maintainability and consistency.
- Collaborated with a cross-functional team and managed version control via GitHub for seamless integration.

Certificates

- TESDA Programming (Python) Level 3
- Civil Service Commission CSE PPT - Professional
